16-core multimode fiber optic patch cord

Overview

The MPO-16 connector integrates sixteen optical fibers into a single compact interface, enabling efficient multi-fiber transmission while significantly reducing cable congestion. A MTP/MPO patch cable with a 16-fiber connector is a high-density fiber optic cable assembly designed for modern data center and high-speed network infrastructure. 22 NA between the core and glass cladding. These multimode fiber optic patch cables consist of circular-core step-index multimode fiber and have an FC/PC connector on one end and an SMA905 connector. Corning offers the most complete line of connectors and factory-terminated cables, from single-fiber cords to high-fiber-count cable assemblies. The Corning Quick Connect program offers a 2-day lead time for our EDGE Uniboot Jumpers, with a 90% delivery guarantee. This state-of-the-art connector brings simplified use to the MPO format by offering optimal field flexibility and enhanced performance, all while leveraging the proven features and technology of. Om4 MPO to MPO patch cord is factory pre-terminated 50/125 Multimode OM4 MPO trunk cable, offering the user the advantage of consistent quality, much faster installation, and simpler cable management.
