48-core optical distribution module

Overview

ODF 48 Core is a high-density fiber optic distribution frame designed to meet the ever-increasing demands of today's network systems. This product is ideal for data centers, server rooms, and other communication distribution systems where space is limited. Welding &distribution module in integration: Plastic structure, easy for installation of inlay, convenient to expand capacity, obliquity of adapter is 30°, which ensure the bend radius of patch cord and avoid laser burning eyes. As the degree of network integration becomes higher. 48-LC Fiber Optic Distribution Frame (ODF), Single Core Optical Distribution Frames (ODF) are an integral part of fiber management systems for the termination, branching, and storage of indoor processing cables. With its fusion and plug-in options, the ODF provides reliable, high-capacity fiber management in a compact 2U height.
