800 cable tray specifications

Overview

Available in 800mm and 1200mm lengths the Cable Tray is ideal for housing under desk power and data units, such as the P-Pack range, as well as neatly routing their associated cables. The Cable Tray is 100mm wide and 60mm deep. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. An 800mm cable tray is a widely used standard size in electrical infrastructure, designed to support and organize large volumes of cables in commercial, industrial, and institutional settings. com under-desk cable management tray helps keep workspaces organized and free of clutter, reducing the risk of tripping hazards and tangled cords. Telecommunication room, network room, data center, telecommunication base station etc. In practice, cable tray dimensions are a system of interrelated measurements —width, depth, length, and material thickness—that directly affect cable fill compliance, heat dissipation, structural loading, and long-term expandability.
