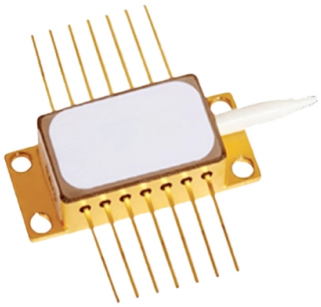
Ghanabe Mechanically Adjustable Attenuator



Overview

They are continuously adjustable (using a thumb wheel or a screw head for examples), and consume zero DC power. They are passive, reciprocal networks (either side can serve as input). New for June 2019: mechanically variable attenuators are often used in lab equipment, so that one unit can serve many purposes (instead of a drawer full of fixed attenuators). ADIsimRF is an easy-to-use RF signal chain calculator. It calculates Cascaded Gain, Noise Figure, IP3, P1dB and Power Consumption. Stages can be easily inserted, removed or temporarily muted. Analog Devices' RF attenuators are available in. Buy Industrial Attenuators Online from Jumia Ghana - Choose from Our Collection of Industrial Attenuators and Shop them at the best price.

Mechanically Adjustable Attenuator

They are continuously adjustable (using a thumb wheel or a screw head for examples), and consume zero DC power. They are available in coax or waveguide. They are passive, reciprocal networks

Mechanically Variable Attenuators

These rugged parts offer excellent, continuously variable (not step) attenuation up to 30 dB, and ~ 1.5 dB per turn of linear, flat, and stable performance.

RF Variable Attenuators

Variable Attenuators from the leading manufacturers are listed on everything RF. Use the filters to narrow down on products based on Attenuation Range, Frequency, Insertion Loss, and Power, and

Variable Attenuators

Konnect RF Variable attenuators are typically used in situations where the input signal level is unknown or varies over time. For example, in a test and measurement system, a variable attenuator may be

Attenuators

Variable Attenuators have low minimum insertion loss, small size, lightweight, operational to 105°C without degradation, excellent for communications.

RF Attenuators

Over 400 coaxial, surface mount, and MMIC attenuator models for 50-Ohm & 75-Ohm syetem including fixed attenuators, high-power attenuators, digital step /

Continuously Variable Attenuators

Continuously variable attenuators from Pasternack are available in 50 Ohm impedance and with SMA connectors. SMA continuously variable attenuators have RF db attenuation values that range from 7
