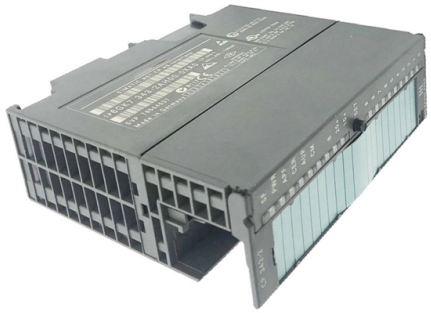
Customs declaration for 12-core remote optical cable



Overview

Customs Ruling NY N351372 These assemblies are comprised of a fiber optic core consisting of 1 to 12 fibers, depending on the model. This core is jacketed.

Key Takeaways

A 12-core remote optical cable is generally classified under HS code 85447000 for optical fiber cables, and its customs declaration requires standard import/export documentation including a commercial invoice and, if applicable, a customs value declaration.

Classification and HS Code

For customs purposes, a 12-core remote optical cable falls under HS code 85447000, which covers optical fiber cables, made up of individually sheathed fibers, whether or not assembled with connectors. This classification applies to cables used in telecommunications and computer networks, including those fitted with transceivers or MPO connectors for high-speed data transmission. Proper classification ensures the correct duty and VAT rates are applied.

Required Documentation

When importing or exporting such cables, the following documents are typically required: Commercial Invoice: Lists the transaction details, total value, currency, and description of the goods. It is essential for customs clearance and should ideally be in English. Customs Declaration Form: An official document submitted to customs authorities indicating the intention to place goods under a customs procedure.

In the E

U, this is submitted online via the Single Administrative Document (SAD) or equivalent electronic system. Customs Value Declaration: Required if the value of the imported goods exceeds certain thresholds (e.g., EUR 20,000 in the EU) to determine the taxable customs value. Proof of Origin: Certifies the country of origin of the goods, which may affect duty rates or eligibility for trade agreements.

Procedural Steps

Determine H

S Code: Confirm the correct classification (85447000 for optical fiber cables) to calculate duties and taxes. Prepare Documentation: Ensure the commercial invoice, packing list, and any certificates of origin are ready. Submit Customs Declaration: File electronically with the customs office at the point of entry or exit.

Include all required details such as product description, quantity, value, and HS code. Pay Duties and Taxes: Based on the declared value and applicable tariff rates. Inspection and Release: Customs may inspect the shipment before releasing it for delivery.

Special Considerations

If the optical cable includes transceivers or connectors, it is still classified under HS 85447000 rather than under telephone or data transmission apparatus (HS 8517) as long as the primary function is as a cable assembly. Ensure compliance with any import licensing or regulatory requirements specific to telecommunications equipment in the destination country. By following these steps and using the correct HS code, you can ensure that your 12-core remote optical cable is properly declared and cleared through customs efficiently.
