Layer 2 switch fiber optic interface

Overview

ES2 | Managed Ethernet Switch with L2/L3 Layer The ES2 is a high-performance managed Ethernet switch offering 16x 1 GbE ports, 4x 10 Gb fiber optic ports.

Key Takeaways

Layer 2 switches with fiber optic interfaces provide high-speed, reliable connectivity for LANs and FTTx networks, supporting both single-mode and multi-mode fiber with management and redundancy features.

Overview

A Layer 2 switch operates at the data link layer, forwarding Ethernet frames based on MAC addresses. When equipped with fiber optic interfaces, these switches can connect over longer distances than copper Ethernet, making them ideal for industrial networks, campus LANs, and FTTx deployments. Fiber Optic Interface TypesSFP (Small Form-factor Pluggable) slots: Allow modular fiber connections, supporting 100 Mbps, 1 Gbps, or 10 Gbps speeds.

SF

P modules can be single-mode or multi-mode, depending on distance requirements. Fixed fiber ports: Some switches come with built-in SC, ST, or E2000 connectors for direct fiber connections.

Bi

Di (Bidirectional) technology: Enables data transmission in both directions over a single fiber, reducing cabling needs.

Common Features

Port configurations: Typical Layer 2 fiber switches include a mix of RJ45 copper ports and fiber uplinks, e.g., 8 RJ45 + 2 fiber ports or 44 SFP + 4 combo ports. Management: Managed switches support SNMP, web interfaces, and remote configuration, while some basic models are unmanaged.

VLAN and Qo

S: Support for IEEE 802. 1Q VLANs, traffic prioritization (802. 1p), and bandwidth control ensures efficient network segmentation and performance.

Redundancy: Protocols like RSTP or MRP provide fast network reconfiguration in case of link failure. Environmental and industrial suitability: Many industrial Layer 2 fiber switches operate in wide temperature ranges (-40°C to +70°C) and have robust metal housings for DIN rail mounting. Use CasesFTTx and Ethernet deployments: Fiber uplinks extend networks to remote locations or between buildings.

Industrial automation: High reliability and redundancy protocols support critical systems.

Enterprise LA

Ns: VLANs, QoS, and PoE/PoE+ options allow integration of IP cameras, phones, and wireless access points.

Summary

Layer 2 switches with fiber optic interfaces combine high-speed connectivity, long-distance transmission, and advanced management features. They are available in various port configurations, support both single-mode and multi-mode fiber, and are suitable for industrial, enterprise, and FTTx network applications.

ES2 | Managed Ethernet Switch with L2/L3 Layer

The ES2 is a high-performance managed Ethernet switch offering 16x 1 GbE ports, 4x 10 Gb fiber optic ports, and Layer 2/3 support. Features include VLAN, QoS,

Get reliable Layer 2 Switches from US stock with fast shipping ...

Layer 2 Fiber Switches are perfectly suitable for FTTx Ethernet based deployments providing features like VLAN (port based and IEEE 802.1q based), traffic priority, bandwidth limiting ingress/egress,

Layer 2+ (L2+) Switches

© 2026 QK FIBER SYSTEMS - All rights reserved

As in Industry leader in copper-to-fiber connectivity, VERSITRON manufactures its L2+ managed Ethernet switches with fiber optic capability allowing you to extend

Fiber Switches and Aggregation Devices | Actelis

Designed for long-distance performance, our layer 2 fiber switches and hybrid fiber-copper ethernet access devices enable and extend high-speed connectivity to

Cisco Switch Selector

Cisco Meraki MS225 series switches provide layer 2 access switching and are ideal for deploying to branch locations. With stacking capabilities and 10G SFP+

10 port managed Ethernet to multimode fiber optic

The EL-1000-4GM is a 10-port managed Industrial Ethernet Layer 2 switches. Compact Ethernet switch with 2 fiber optic and 8 RJ45 ports which support

Fast, Gigbit, and 10 Gigbit Ethernet Switches with SFP+ Modules

Managed and unmanaged Layer 2 and Layer 3 fiber optic Ethernet switches. With 10G SFP+ fiber optic transceiver modules, they meet your highest bandwidth demand.

12-Port 10G Layer 2 Managed SFP+ Switch

TRENDnet''s 12-Port 10G SFP+ switch features ultra-fast link speeds & advanced layer 2 management features. This 10Gb fiber switch is a cost-effective & reliable

EDS-G516E Series

The EDS-G516E Series is equipped with 16 Gigabit Ethernet ports and up to 4 fiber-optic ports, making it ideal for upgrading an existing network to Gigabit speed or building a new full Gigabit backbone.

24-Port L2+ Fiber Optic SFP Managed Switch

Layer 2+ managed switch with powerful traffic management and QoS features, offer MAC address filtering and VLAN capabilities as long as static routing feature so you can segregate networks,

Fiber Optic vs Ethernet Port Differences: Connectors

Some of you would ask about the interfaces on the Switch. It is the transmission medium conversion on the pure physical layer, which is actually the conversion

Fiber Optic Switch: A Comprehensive Guide
