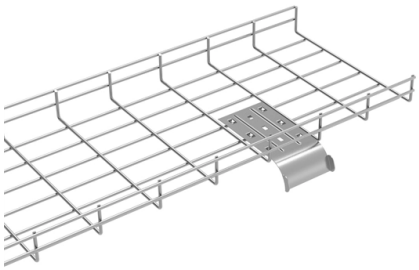
Double-hole explosion-proof distribution box



Overview

·Equipped with specialized hinge structure, which can prevent the flameproof joints from damage when opening and closing the box, and greatly prolong the service life of box.

Key Takeaways

A double-hole explosion-proof distribution box is a certified enclosure designed to safely house electrical components in hazardous areas, featuring two conduit or cable entry points for secure wiring. Key FeaturesExplosion-proof design: These boxes are engineered to prevent ignition of surrounding explosive atmospheres caused by sparks or heat from internal electrical components. They are typically certified under ATEX, IECEx, and UL standards for use in gas (Zones 1 and 2) and dust (Zones 21 and 22) hazardous areas.

Double-hole configuration: The “double-hole” refers to two pre-drilled or threaded openings for conduit or cable entry, allowing flexible wiring and separation of power and signal lines. This design simplifies installation and ensures compliance with safety regulations. Materials and durability: Common materials include stainless steel (AISI 304L or 316L), aluminum, and GRP polyester, offering high corrosion resistance, impact strength, and long-term durability in harsh environments such as chemical plants, offshore platforms, and oil & gas facilities.

Protection ratings: These boxes often feature IP66 or higher, providing dust-tight and water-resistant protection. Flameproof (Ex d) and increased safety (Ex e) designs ensure that internal faults do not propagate to the external environment. Modular and pre-assembled options: Many manufacturers offer pre-assembled terminal blocks, cable glands, and accessories, allowing immediate commissioning.

Modular designs enable customization for specific technical requirements, including different terminal arrangements and enclosure sizes. Applications: Double-hole explosion-proof distribution boxes are widely used in industrial automation, chemical processing, offshore and marine installations, and hygiene-critical environments, where reliable power and signal distribution is critical. Installation and maintenance: Rugged construction and thoughtful design simplify mounting, wiring, and maintenance, while ensuring continuous protection against explosive atmospheres.

In summary, a double-hole explosion-proof distribution box provides a safe, durable, and flexible solution for electrical distribution in hazardous areas, combining certified explosion protection, robust materials, and practical installation features.

When it comes to Hazardous Location Electrical Boxes, you can count on Grainger. Supplies and solutions for every industry, plus easy ordering, fast delivery and 24/7 customer support.

Hazardous Location Electrical Boxes | McMaster-Carr

Choose from our selection of hazardous location electrical boxes, including outlet boxes and covers, weatherproof outlet boxes and covers, and more. Same and Next Day Delivery.

Explosion-Proof Electrical Distribution Boxes: Applications in ...

Find out how explosion-proof electrical boxes keep people and equipment safe in risky environments like oil, gas, and chemical industries !

Explosion proof Lighting Distribution Box-Ouhui Lighting

Explosion proof Lighting Distribution Box, products shock-resistant and durable, energy-saving and environmentally friendly, models and styles are complete, direct sales, international certification,

Explosion proof Power Distribution Panel Box

Power Distribution panel box - Hazardous locations for explosive gas mixtures: Zone 1 and Zone 2. Explosive gas mixtures: Class IIA, IIB, and IIC.

BXM (D)51 Series Explosion proof Distribution Boxes Lighting

BXM (D)51 Explosion proof Distribution Boxes Explosion protection to -CENELEC -IEC -NEC Can be used in Zone 1 and Zone 2 Zone 21 and Zone 22 Class I, Zone 1 and Zone 2 Class I, Division 2,

BM (D)X-Series Explosion Protected Distribution Box

BM (D)X-Series Explosion Protected Distribution Box Explosion protection -IECEx (IEC) -ATEX (CENELEC,EN) -China Ex (GB) Application in hazardous area -Zone 1 and Zone2, -Zone 21 and

HRMD92 Explosion proof Distribution Box (Ex d IIB+H2)

Warom Explosion proof Distribution Box (Ex d IIB+H2) in 316 stainless steel. Available with a wide range of built in components.

Terminal and Junction Boxes (Ex d) | Explosion Protection

Pepperl+Fuchs provides a specialized portfolio of Ex d (flameproof) and Ex tb (dust protection by enclosure) certified terminal boxes and junction boxes engineered for reliable use in explosion

Control panels | Distribution boards | Ex | Ex d | Ex de | ATEX ...
