Dual-light lens module

Overview

Dual lens systems can significantly enhance the clarity of images captured in low-light conditions by effectively aggregating light information from both lenses. This technology captures more data, reducing noise and improving image fidelity, even in darker environments. Comparative statistics. Based on 800P monochrome (black&white) global shutter sensor OV9281, assembled with a 63° (H) no distortion M12 lens without IR pass filter, sensitive to IR. Global Shutter: Shoot high-speed moving objects in crisp sharp images. Avoid the rolling artifacts to get a much more accurate complete. ELP high frame rate 960P 60fps double lens USB webcam module: ELP double lens camera module offers incredibly sharp HD to capture crystal clear images and record 960@60fps. Mini embedded camera board for all types of machines as below: machine equipment, all in one automaton, POS equipment, STB. Hampo 003-1018 is a a simultaneous dual lens USB camera module, with dual 1/2. 7″ CMOS Omnivision OV2710 image sensor, the max resolution is 1920*1080P @30fps for each camera,delivery about 0. The PCB board size is about 80*16*20 (mm). 1/3″ CMOS AR0331 & AR0130 sensor 3MP. Dual Lens Camera module is with Himax HM2131 sensor, here's the specifications: Both camera are designed with Himax Sensor HM2131, but the lens are different constructions. The 850nm IR led is easy to plug in or take off the dual. The blog discusses real-world implementation benefits of the dual lenses camera module, highlighting superior synchronization, reduced latency, enhanced 3D vision accuracy, and adaptability in challenging industrial environments such as varying lighting and high-motion setups.

Article Content

How Dual Lens Camera Modules Enhance Depth Perception in

Dual lens systems can significantly enhance the clarity of images captured in low-light conditions by effectively aggregating light information from both lenses. This technology captures

ELP 210fps Monochrome Global Shutter USB Camera Module

Fast frame 210fps 120fps binocular usb camera module for live streaming! Small outline and thin profile for embedded machines! Plug and play,free driver,UVC compliant, just plug in and go. Full content

G Double Lens USB Camera Module 960p 60fps 3D Stereo ...

ELP high frame rate 960P 60fps double lens USB webcam module: ELP double lens camera module offers incredibly sharp HD to capture crystal clear images and record 960@60fps.

Dual Lens Camera Module

Hampo 003-0514 is a a synchronized dual lens USB camera module, with 1/2,7″ CMOS AR0230 & OV2710 image sensor, the max resolution is 1920*1080P

Dual Lens Camera Module USB with 850nm IR Light

The HM2131 is a high sensitivity, low power, and high frame rate 1/2.7″ 1080p CMOS Image Sensor (CIS) designed for driver recorder, IP camera,

Why the ELP 1200P Dual Lenses Camera Module Is My Go-To

The blog discusses real-world implementation benefits of the dual lenses camera module, highlighting superior synchronization, reduced latency, enhanced 3D vision accuracy, and adaptability in

Dual Lens Camera Module-Shenzhen CM Technology

Through our continuous effort and investment, we are fully able to meet customers'' requirement for 1MP camera modules, 2MP, 3MP, 5MP, 8MP, 13MP, etc, either

2MP+2MP Dual-lens Camera Module

Enhance your imaging capabilities with our 2MP+2MP Dual-lens Camera Module. Designed for versatility and efficiency, this advanced module features a wide dynamic image sensor, ultra-low

Dual Lens Camera Module

© 2026 QK FIBER SYSTEMS - All rights reserved

Dual lens camera modules are commonly found in high-end smartphones, such as the iPhone X, Samsung Galaxy S9, and Huawei P20 Pro. They can also be used

2MP Dual Lens USB Camera Module with Fill Light for Industrial Use

2MP dual-lens USB camera module with GC2083 CMOS sensors, fill light, and USB2.0 interface. Ideal for industrial inspection and embedded vision projects.

Dual Spectrum Drone Thermal Camera Infrared Visible Light Dual Lens ...

Camera module,HD camera 4. why should you buy from us not from other suppliers? Shenzhen Xinhuihong Technology Co., Ltd. is a professional manufacturer of CMOS camera modules and

Dual Lens Camera Module Solutions

A dual lens camera module is a camera system that consists of two lenses working together to capture images or videos. It allows for depth perception, improved

ELP 4MP Dual Lens USB Camera

ELP 4MP Dual Lens USB Camera - Wide Angle, 1080P 60fps, Lightburn, Mini UVC USB2.0 Laser Engraver Camera Module for Computer & Raspberry Pi

Dual Lens Camera Module-Shenzhen CM Technology

4MP, Dual Lens, Stereo Vision Camera Module with Omnivision OS02G10 sensor 2.5MP, Dual Lens, 360° VR Panorama Camera Module with ON-Semiconductor

ELP 210fps Monochrome Global Shutter USB Camera

ELP 210fps global shutter dual lens usb camera module synchronization web camera ELP-USB3DGS800P01-V83 ELP Dual Lens USB Camera 800P Double

Dual Lens Camera Module Solutions

Our Dual Lens Camera Module is a testament to our commitment to technological excellence. Designed for unparalleled performance, this module combines two lenses, enhancing depth perception and

IR850+RGB HD Dual Lens Imaging Module with MIPI

Explore our high-quality IR850+RGB HD dual lens imaging module with wide dynamic capabilities, 60 FPS, and 1080P resolution. Ideal for a wide range of

ELP 1080P Dual Lens USB Camera Module 3D Stereo

ELP 2mp Dual Lens Webcam Board Module with 1/3inch AR0330 Image Sensor for sharp image monitoring,double fixed focus M9 90degree no distortion wide angle
