Feeder cable optical cable

Overview

Fiber optic feeder cables are essential components in modern telecommunications and data networks, serving as the backbone that delivers high-speed optical signals from central hubs to distribution points. Microfocus optical fiber cables are available in a wide range of configurations to meet the requirements of any project. Over 30 years ago, OCC became a pioneer in the design and production of fiber optic cable. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3. 0 solution uses two transformative technologies to support five typical network scenarios. In the earliest FTTH solution, ODN 1. 5, 100, 200, 400, 600, and 1000 micron UV/VIS or VIS/NIR, and NIR multimode fibers.
