Fiber optic panel socket 2 ports

Overview

The low profile ftth fiber wall outlet features 4 cable inlets and 2 SC adapter ports, providing 2-core fiber splicing and termination for home or small office networks.

Key Takeaways

A dual-port fiber optic socket panel provides two SC/LC/FC interfaces for FTTH or small business networks, supporting flexible installation and secure fiber management.

Overview

A dual-port fiber optic socket panel serves as the termination point for fiber optic cables, connecting incoming fiber drop cables to subscriber equipment such as ONTs (Optical Network Terminals) in residential or small business environments. It is designed for FTTH, FTTB, or FTTD applications, ensuring reliable signal transmission and maintaining the proper fiber bend radius to prevent signal loss.

Key Features

Adapter Compatibility: Supports SC, LC, and FC adapters, allowing versatile connection options for different fiber types. Dual Ports: Provides two fiber interfaces, suitable for single-core or dual-core fiber connections. Cable Management: Dual-layer or internal structures allow for easy slack management, splicing, and termination while maintaining a reasonable bend radius.

Material and Protection: Typically made of high-quality ABS plastic, offering shockproof, dustproof, and waterproof protection for indoor use. Flexible Installation: Can be wall-mounted, surface-mounted, or placed on a desktop, accommodating various deployment scenarios. Compact Design: Ultra-slim or small form factor panels minimize wall space usage while providing sufficient internal space for splicing and termination.

Specifications

Dimensions: Common sizes include 120 x 90 x 25 mm, or ultra-slim 86 x 86 x 12. 7 mm.

Cable Entry/

Exit: Multiple entry points (front, back, bottom) for flexible fiber routing. Capacity: Supports 2 single-core fibers, with optional pigtail splicing inside the enclosure. Accessories: Often includes fiber plugs, installation screws, and heat-shrinkable sleeves for secure connections.

Applications

Residential FTT

H: Provides a reliable interface for home fiber networks. Small Business Networks: Supports office or small enterprise fiber connections. Public Spaces: Suitable for offices, shopping malls, or computer rooms where fiber access and output are required.

Advantages

Ensures high transmission quality and signal reliability. Protects fibers from dust, water, and mechanical damage. Simplifies installation and maintenance with pre-configured adapter slots and removable protective hoods.

Compatible with multiple connector types, making it versatile for different network setups. In summary, a dual-port fiber optic socket panel is a compact, durable, and versatile solution for terminating and managing fiber connections in homes, offices, and small business networks, providing secure, high-quality fiber connectivity with flexible installation options.

Low Profile 2 Port Surface Mount Fiber Wall Box for SC/APC

The low profile ftth fiber wall outlet features 4 cable inlets and 2 SC adapter ports, providing 2-core fiber splicing and termination for home or small office networks.

Fiber Terminal Box 2 Cores SC Wall Outlet Faceplate Socket Panel

Drop cable of diameter 2mm, 3mm and 2x3mm can be equipped together with the panel. Above all, the whole set terminal box including optical panel, plastic expansion screw and heat shrinkable sleeve

2 Port FTTH Indoor Socket Panel Fiber Optic Terminal Box

SP-1601-2C-2 provides Customer Premises Equipment applications with a compact and secure enclosure for connecting fiber cables within building entrance locations, communications closets, and

2 Port Indoor Fiber Optic Wall Outlet Box, 2 Cores Splice

This 2 port indoor fiber wall outlet serves as a professional demarcation box, engineered to transition incoming drop cables to subscriber ONT (Optical

2 Fiber Wall Outlet Box with 2 SC Ports

This wall outlet box is for joining fiber optic cable and pigtails. They protect fiber optic splices and are ideally used for telecommunications industry.

2-Port FTTH Optical Fiber Terminal Box 2-Channel

Buy 2-Port FTTH Optical Fiber Terminal Box 2-Channel Socket 2-Core Splitter 86x86mm FTTH Fiber Panel Fiber Optic Terminal Dual SC Junction Box online

2 Port Surface Mount Fiber Box With SC/APC Outlet for FTTH

The fiber wall socket supports splicing, termination and storage functions for optical fiber for FTTH, FTTB,FTTD applications, usually mounted on the wall or home standard electrical junction box. The

Fiber Wall Socket /2 Ports FTTH Fiber Optic Terminal Box Panel Wall ...

(Additional Fiber Optic Coupler can find in our store as well) Fiber Wall Socket /2 Ports FTTH Fiber Optic Terminal Box (INDOOR USE) 2 Ports FTTH Fiber Optic Termination Box Panel Wall Outlet

2 Port Optical Fiber Information Panel with SC/UPC

Indoor Wall Mounted, Single Door Optical Fiber Information Panel is ideal for end terminations of fiber optic runs in residential or commercial buildings. The PPFTB
