Install 200G Access Switch

Overview

SIMATIC NET SCALANCE XP-200G Industrial Ethernet switches These operating instructions will help you to install and connect devices of the SCALANCE XP-200G.

Key Takeaways

The D-Link DIS-200G Series switch can be installed on a DIN rail or wall, powered via external adapters, and configured through Web UI or CLI after proper mounting and connection.

Package Contents

Before installation, ensure your package includes: DIS-200G Series switchDIN rail mounting kitWall mounting kitQuick Installation GuideConsole cableUser guide CD (optional) If any items are missing or damaged, contact your local D-Link reseller.

Installation Precautions

Install the switch in a cool, dry place with proper ventilation (at least 10 cm above, below, and behind the switch),. Avoid stacking devices on top of the switch. Verify power and grounding requirements before mounting.

Be cautious of hot surfaces during operation. Mounting OptionsDIN Rail MountingEnsure the DIN rail is level and the mounting kit is correctly attached to the switch. With the back of the switch facing the DIN rail, lower the top part of the rail kit onto the rail.

Push the switch vertically down and rotate the bottom toward the rail to secure it. To remove: push the switch down to create space, rotate the bottom upward, and lift the switch off the rail.

Wall Mounting

Remove the DIN rail kit if present. Align the wall mounting plates with the openings on the back of the switch and secure with screws. Alternatively, use the built-in screw hooks underneath the switch to mount on a solid surface.

Power Connection

Connect the supplied power adapter to the switch's power input and then to a mains source. For models with multiple power sources (PWR1, PWR2, PWR3), ensure all connections are secure.

Verify LE

D indicators: solid green indicates the switch is powered and ready for web/CLI access; amber or blinking LEDs indicate booting, PoE issues, or power failure.

Network Connections

Use 10/100/1000 Mbps RJ-45 ports for standard device connections. Use 1 Gbps SFP ports for uplinks to other switches with compatible fiber modules. Connect a console cable to the RJ-45 console port for CLI access if needed.

Initial Configuration

Access the switch via Web UI or CLI to configure VLANs, port settings, and security features. Ensure firmware is up to date before deploying the switch in production.

Safety Notes

Avoid exposure to water or physical damage. Follow electrostatic discharge precautions when handling the switch. Do not touch hot surfaces during operation.

Following these steps ensures a safe and functional installation of your D-Link DIS-200G 200G access switch, ready for network deployment.
