Libya Active Optical Cable QSFP

Overview

The QAOC-10G4F1A is a 40Gb/s, hot pluggable active optical cable for Infiniband and Ethernet data transmission. It provides full duplex, parallel interconnects: 4 transmitting / 4 receiving data lanes and supports distance up to 100 meters. 6Wresearch actively monitors the Libya Active Optical Cable Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our insights help businesses to make data-backed strategic decisions with ongoing market dynamics. Each lane can operate at 10 Gbps with lengths ranging from one. The QSFP+ to 4xSFP+ passive cable assembly features high-performance, cost-effective SFP+ and QSFP+ device interconnections that connect QSFP+ and SFP+ switches and network devices without upgrading the entire data center or storage array. Originally designed for 40G Ethernet (QSFP+), they have evolved to support 100G, 200G, and 400G speeds with new standards like QSFP28 and QSFP-DD. COMPLIANT WITH THE QSFP MSA AND IEEE 802.
