Gyfa Special Optical Cable

Overview

Product type: Outdoor Optical Cable for Communication GYFTA Application: Trunk line and metropolitan area network Product description: Optical fiber, loose tube design, non-metallic central strength member, SZ stranded core filled with gel, double sided plastic coated. Product type: Outdoor Optical Cable for Communication GYFTA Application: Trunk line and metropolitan area network Product description: Optical fiber, loose tube design, non-metallic central strength member, SZ stranded core filled with gel, double sided plastic coated. Water-blocking construction Moisture-proof and prevents water penetration Special tube filling gel Reduce or eliminate reflection losses and prevent water penetration Fiber reinforced plastic as central strength member High Young's modulus Longitudinal coated steel tape High desirable tensile. Optical fibres are housed in loose tubes that are made of high-modulus plastic and filled with water blocking yarns. The tubes are stranded around the central strength member to form a cable core. The core is covered by water-blocking tape (and armored with laminated aluminum tape or corrugated. China GYFA manufacturers, GYFA suppliers, GYFA wholesaler - Zion Communication is a professional manufacturer of cables and accessories for signal and low voltage transmission. For GYFA, everyone has different special concerns about it, and what we do is to maximize the product requirements of each. Full-dry GYFA Stranded Loose Tube Armored No-gel filled Optical Fiber Cable Optical fibres of GYTA are housed in loose tubes that are made of high-modulus plastic and filled with water blocking yarns.
