Transmit/Receive Modules

History of T/R ModulesT/R Module Sizing and FrequencyT/R Module Block DiagramT/R modules are sized to fit within the lattice of a phase array, which is a function of frequency. A good rule of thumb is that within the plane of the array, the modules must stack together to meet a half-wavelength spacing. At 10 GHz this is 1.5 cm, or about 600 mils. Depending on the system design the module might be close to 1/2 wavelength in ...See more on microwaves101 All Acronyms
