Trough-type polyurethane composite cable tray

Overview

A trough type cable tray is a continuous rigid structure used to securely support insulated electrical cables and raceways. Unlike ladder-type trays, it features a solid or ventilated bottom that provides superior cable support and protection against dust, moisture, and falling. HAURATON drainage channels have been cleverly adapted with the inclusion of solid covers and cable trays as a floor-laid cable routing system to carry cabling, pipelines, utilities, broadcast and communication systems safely and securely. Available in a variety of widths and sizes, SERVICE CHANNELS. Refers to the approximate width of a cable tray used for specifying. Selecting a specific width will show cable trays with that width, as well as cable tray accessories compatible with that width.
